7.50MM PITCH SABRE™ CONNECTORS-SINGLE ROW

The Sabre™ system is a robust power connector supplying up to 18 amperes for high current applications. Designed and patented by Molex engineers, Sabre™ standardizes manufacturing footprints by offering both wire-to-wire and wire-to-board configurations. The terminal is designed with a Terminal Position Assurance (TPA) feature that virtually eliminates terminal backout. Activation of the TPA feature is optional. The positive locking latch on the receptacle housing prevents accidental disconnection.
