

**New Ion Pump Controller and Rim Box Monitor
New Rim box to Pax Case Cable
200-05-07**

Photos below show current Feed with Ion Pump Control.

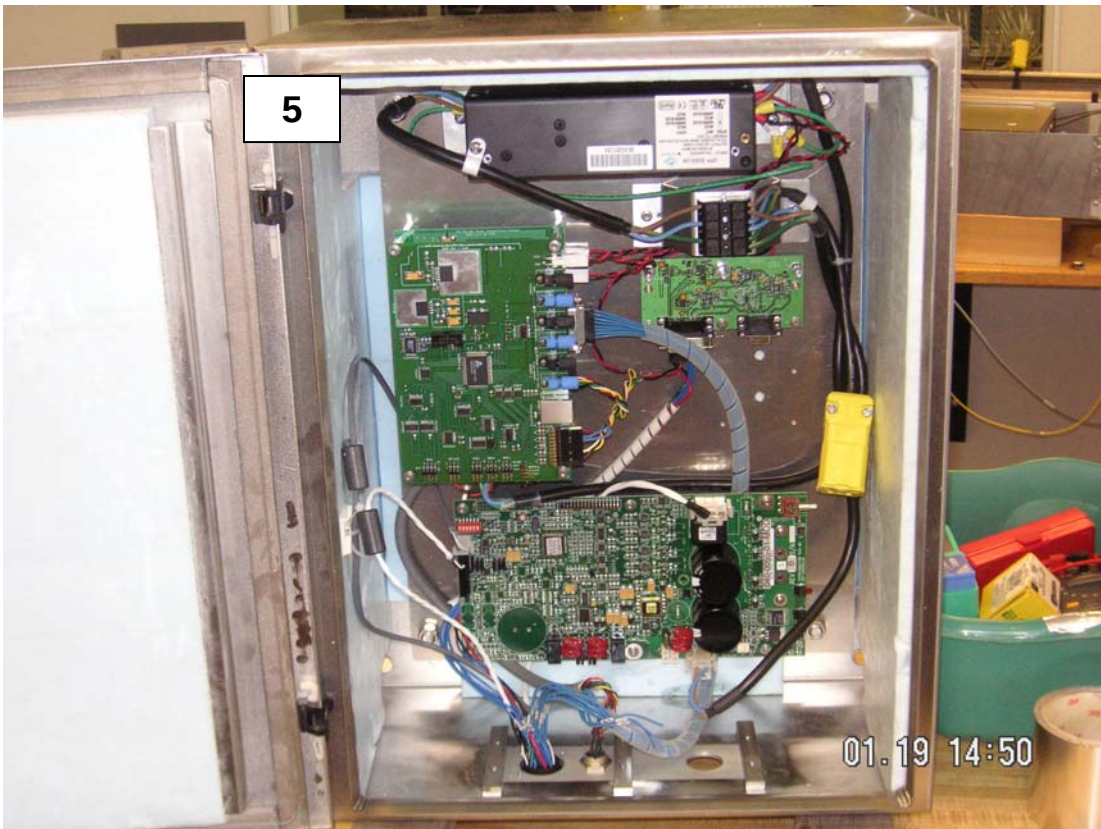

Controller (high voltage supply) is bungee corded to top of Pax Case Lid. High voltage coax cable (1/4 dia) comes through hole in Pax Case.

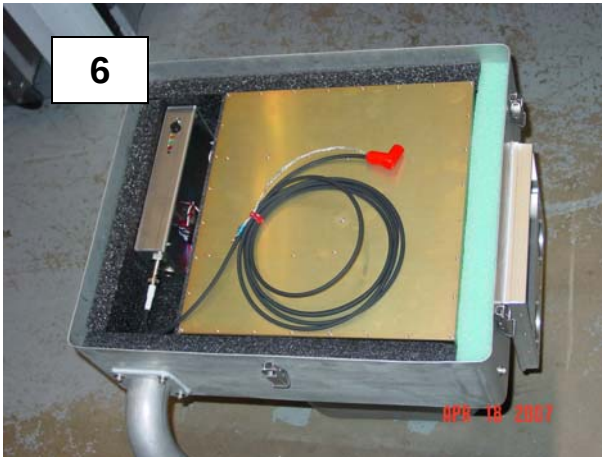

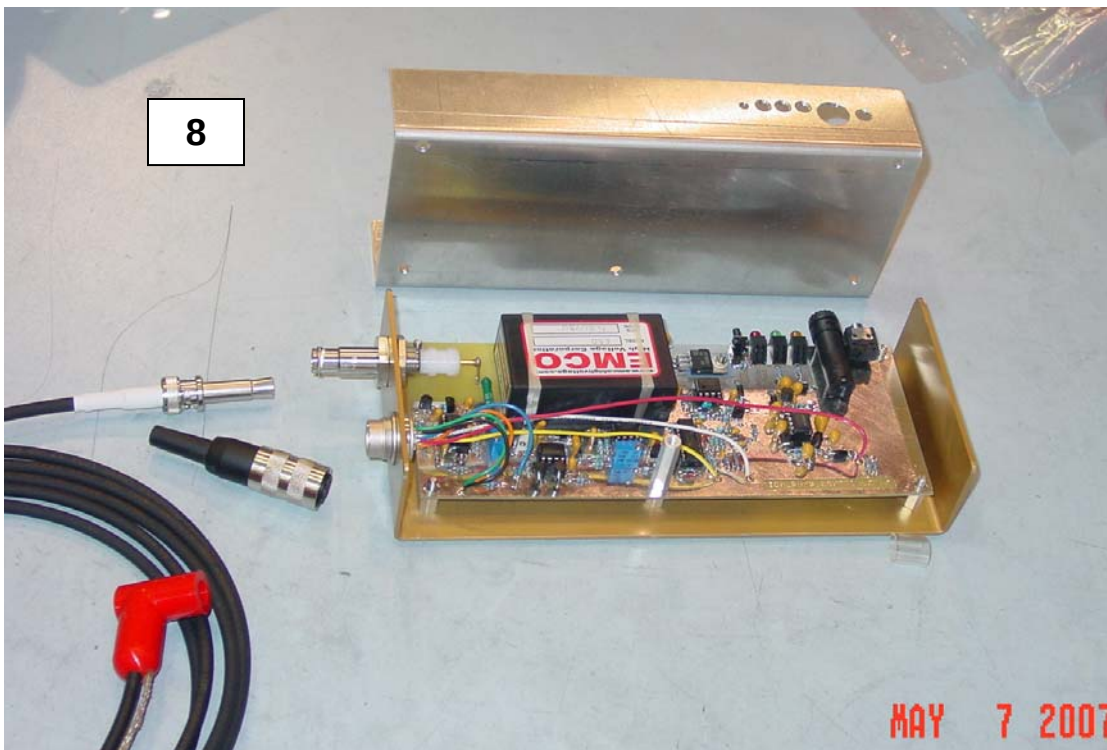

Below: Internal wiring of older rim box shown. Note bulkhead connector with many wires distributed to locations throughout the box. Also note Power terminal block and position of TEC Control Board.

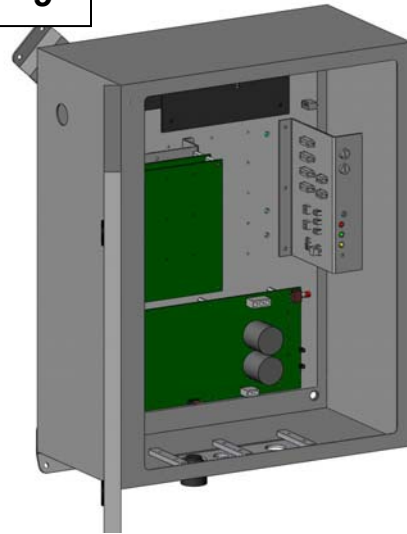

New Ion Pump Controller positioned inside the Pax Case.

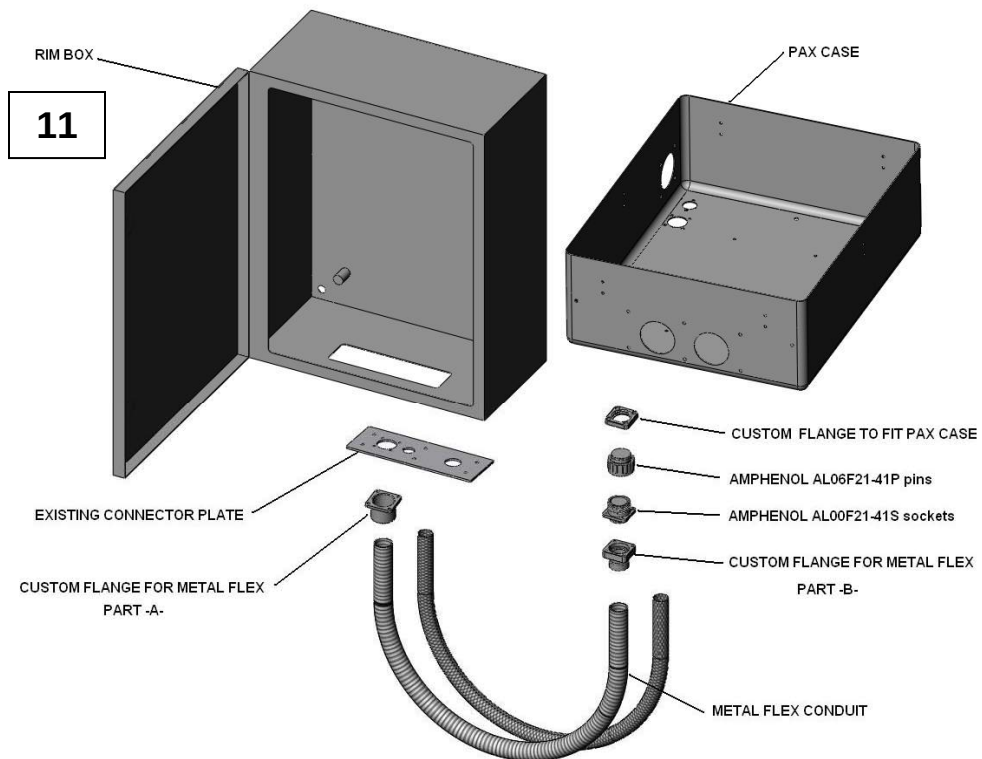

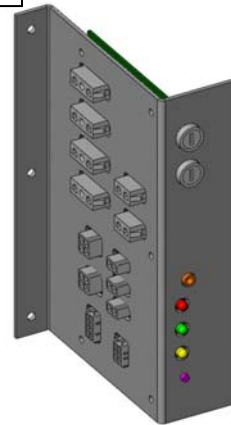

New Ion Pump Controller with input & output shown. New Monitor Board.
